

Webinar with ITAsoft, Indonesia - Supercharging Biz Solutions Delivery in BFSI, Leveraging Citizen Development on Joget DX 8

In a recent webinar, Mokxa & ITAsoft (a Mokxa company specialized in providing tech solutions), discussed how BFSI companies should leverage citizen development to achieve rapid digital transformation on low-code Joget. In the event, Fahmi Jafar, COO at ITAsoft, delved into modern approaches and industry-proven best practices. He shed light on must-haves that companies should embrace to empower their business-IT teams in building innovative and highly adaptable business solutions. The centerpiece of the event was a demo of the Joget DX 8 release, showcasing the creation of a fully-functional 'Banking Customer Onboarding App' under 15 minutes without code. Adding depth to the discussion, Fahmi also shared their experience in supporting a 40+ year-old Indonesian auto financing company - using Joget since 2012 for multiple biz process automation, benefiting over 3,500 enterprise-wide users. Watch the webinar to learn more about their digital transformation journey.

Joget LAB with Allied Benefit Systems & rfidCollect: Tech-enabled Transformation Simplified Using Mokxa Solutions

At the recent Joget LAB, we hosted a panel discussion with tech leaders from healthcare and public sectors. In the event, Josh Silverman, Chief Transformation Officer at Allied Benefit Systems, discussed the strategic shift toward positively embracing change to foster innovation in building enterprise solutions. Using one of the Joget apps, they recently achieved another 75% time savings in generating 'Policy Description Docs' for their customers. Meanwhile, Tim Buckley, Executive V.P (Sales & Marketing) at rfidCollect, stressed the needs for businesses to employ technologies like IoT & low-code to digitize data collection and asset management. He shared their partnership with Mokxa & Joget in offering the NOTIFY solution, transforming it from a Covid-19 risk notification system into a versatile asset management solution applicable across industries. The panel wrapped up with a Joget demo, creating a 'School Enrolment Registration App' in minutes powered by the Joget Gen AI plugin—no code needed, just a prompt away. Want to explore further? Watch the recording to learn more.

Simple, Swift, and Scalable: Mokxa Modernized Absentee Ballot Requests for Vote Absentee Virginia in A Week

Working with Vote Absentee Virginia (a not-for-profit organization in Falls Church, VA) we used Joget to deliver the 'eAbsentee Portal'. Sponsored by our client, 'eAbsentee' was launched in 2019 for voters to apply for absentee ballots. However, their previous website was inefficient and costly to manage on high-code. Through user-friendly screens, our solution simplified the absentee ballot submissions process. Without portal logins, voters can enter their details and validate them in the right format, saving time while reducing overhead. Following each submission, a PDF-form with accurate population of voter's data on specific fields is generated. This allows Vote Absentee Virginia to comply with the original template set by the electoral board. Using the portal, they could instantly alert the county's staff on email when a new submission is made, and process them in no-time. With increased accessibility, Vote Absentee Virginia was able to attain a higher voter turnout. Next up, they plan to scale up Joget for more use cases across the U.S. Public Offices. Read the case study to learn more.

Mokxa Supports Katalyst India to Empower Women for Equality in Opportunity and Leadership

At Rio, Goa, Mokxa participated in the 13th annual convention of Katalyst India, an award-winning NGO that stands for the economic empowerment of women. As their technology partner since 2017, we took pride in co-creating a suite of apps that brought modern digitization to their student development program. By automating tasks like training schedules & attendance, we enabled them to refocus on student development, while delivering a remarkable efficiency boost across their operations, benefiting 1500+ users. Notably, we recently collaborated for a seamless Joget portal upgrade to DX 8, providing an improved user experience with better governance for their staff & students. As part of our philanthropic mission, we also extended career opportunities to the gifted 'Katalysts', actively engaging in their placement programs over the years. Read the blog to learn more about our journey with Katalyst India.
